PROFILE

Front-End Developer focused on building clean, responsive, and user-focused web experiences. I work with React, JavaScript, HTML, CSS, APIs, Bootstrap, and Tailwind CSS, with hands-on experience developing web applications and responsive websites. My background in hospitality brings a practical, detail-oriented approach to problem solving, teamwork, and working effectively in fast-paced environments. Bilingual in English and Portuguese, and open to freelance projects and web-development volunteer opportunities.

SKILLS

Front End	HTML5, CSS3, JavaScript (ES6), React, TypeScript
Styling	Bootstrap 5, Tailwind CSS, Responsive Design
APIs & Development	REST APIs, API Integration, Git, GitHub
Additional	Accessibility Basics, AI-Assisted Development
Languages	English, Portuguese

SELECTED PROJECTS

Weather App

React · REST API

Built a responsive weather application that connects user searches to live weather data. Focused on component-based structure, API integration, responsive layouts, loading and error states, and clear presentation of current conditions and forecasts.

Live · GitHub

World Clock

JavaScript · Timezone Data

Built a searchable world clock for checking local time across multiple cities and time zones. Refactored repetitive JavaScript into a more reusable structure and refined the interface for different screen sizes.

Live · GitHub

Vitória Travel Guide

HTML · CSS · Bootstrap

Created a responsive travel guide for Vitória, Brazil, organizing attractions, restaurants, photography, and practical travel resources. Focused on content hierarchy, responsive layout, and integrating external resources such as maps and social content.

Live · GitHub

The Line

React · TypeScript · APIs · AI-assisted development

Independent product project inspired by professional kitchen experience. The planned toolkit brings recipe scaling, food costing, prep planning, menu development, nutrition information, and recipe generation into one place. Currently in early development.

La Paz Hostel Website

React · Bootstrap

Upcoming single-page practice project for a hostel in La Paz, Bolivia. Planned features include hostel information, a city guide, activities, restaurant recommendations with addresses and map directions, contact information, and a contact form. The project will use dummy data initially and focus on clean, responsive, maintainable code.

PROFESSIONAL EXPERIENCE

Hospitality & Food Service Professional · 10 years of professional experience

Experience across kitchen and front-of-house operations, including cooking, sous chef, serving, and hosting. Developed organization, attention to detail, teamwork, adaptability, communication, and problem-solving skills in fast-paced environments.

EDUCATION & CERTIFICATIONS

SheCodes · Junior Developer Certificate · 2026

Relevant training in React, JavaScript, responsive web development, HTML, CSS, Bootstrap, APIs, and hands-on front-end projects.

Open to freelance web projects and volunteer opportunities with organizations that need website or front-end support.
